2016

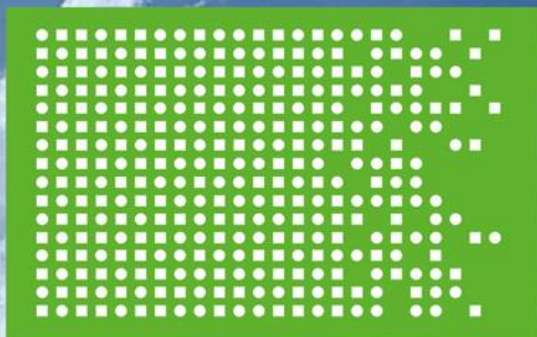

# NORGES ENERGI- DAGER 2016

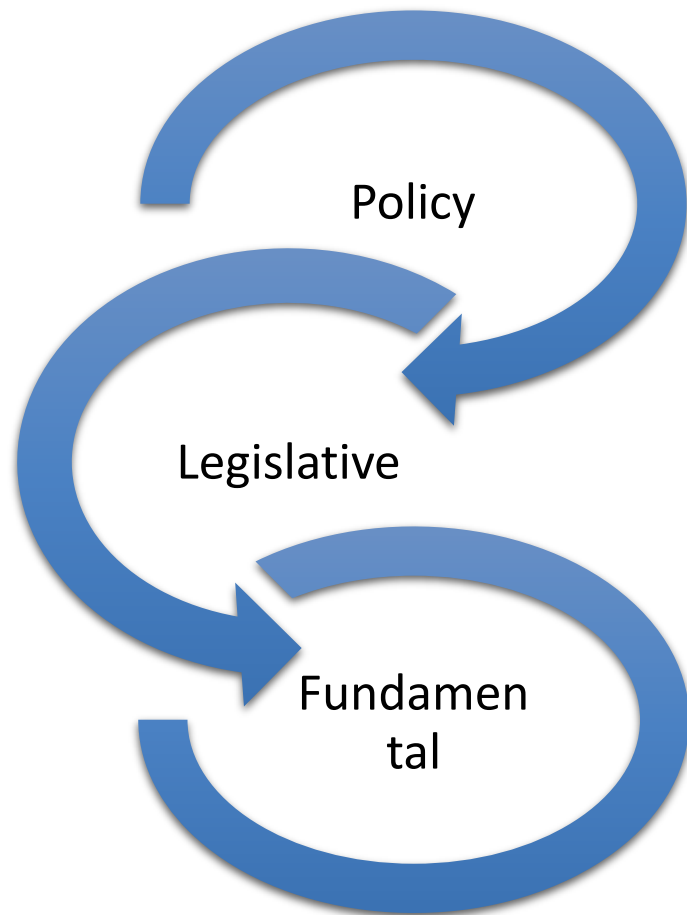

Kan Norden vise vei for det europeiske engrosmarkedet?

Can the Nordics show Europe how?

Vivi Mathiesen, Head of section, Wholesale markets

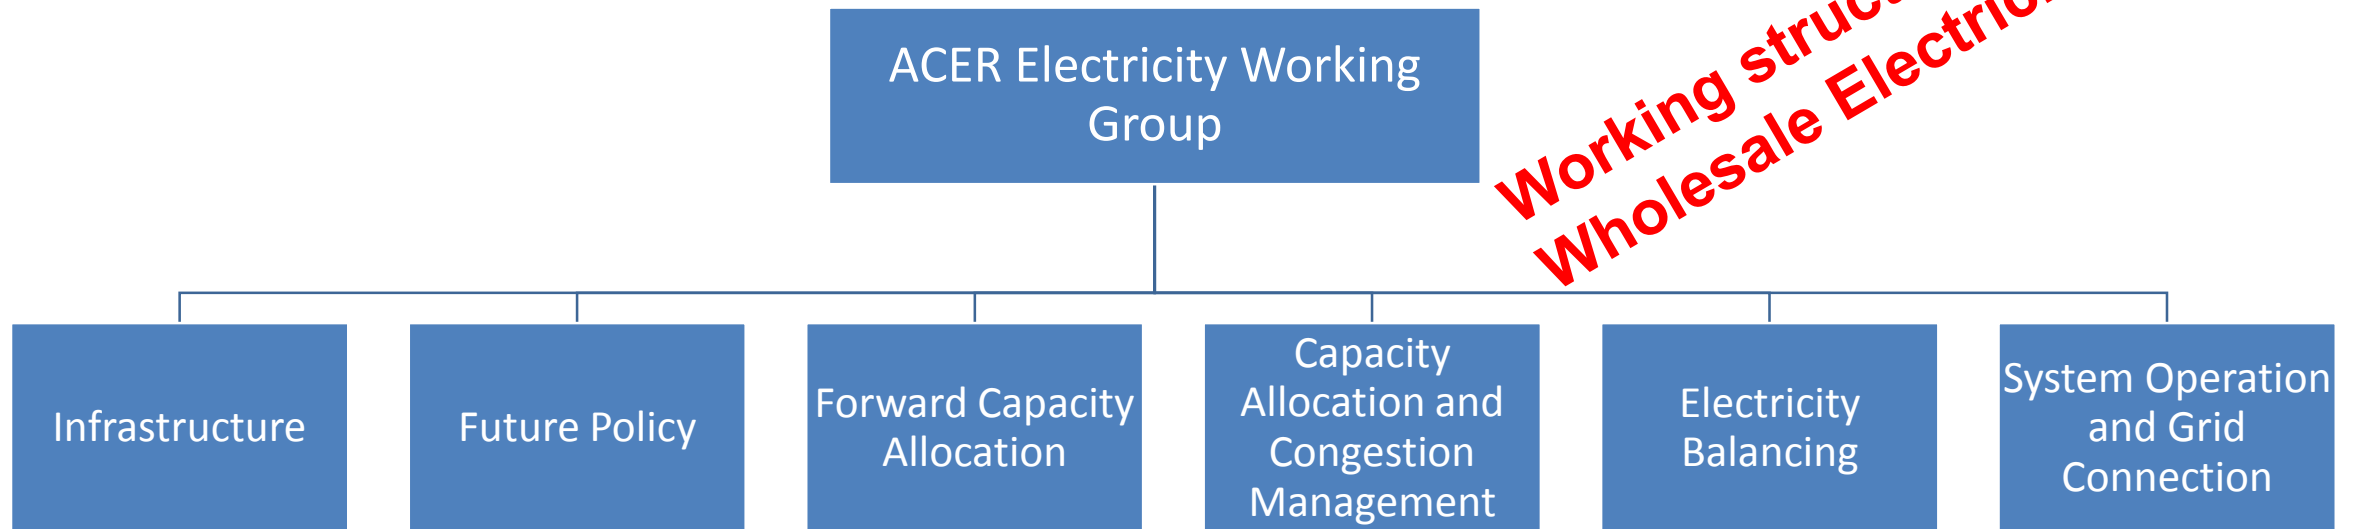

# The Nordic market is undergoing changes

- Increased RES share
- Increased interconnection
- Need for improved market solutions
- Necessary with cooperation to solve common challenges

# New regulations and decision making are increasingly European-wide

- Processes involving the Commission, TSOs, regulators and member states
- Formed in cooperation between energy regulators, within the structures of ACER

# Nordic energy market regulators (NordREG)

- Cooperation through NordREG since 2002

Board

Regulation

Retail Market

Demand Flexibility

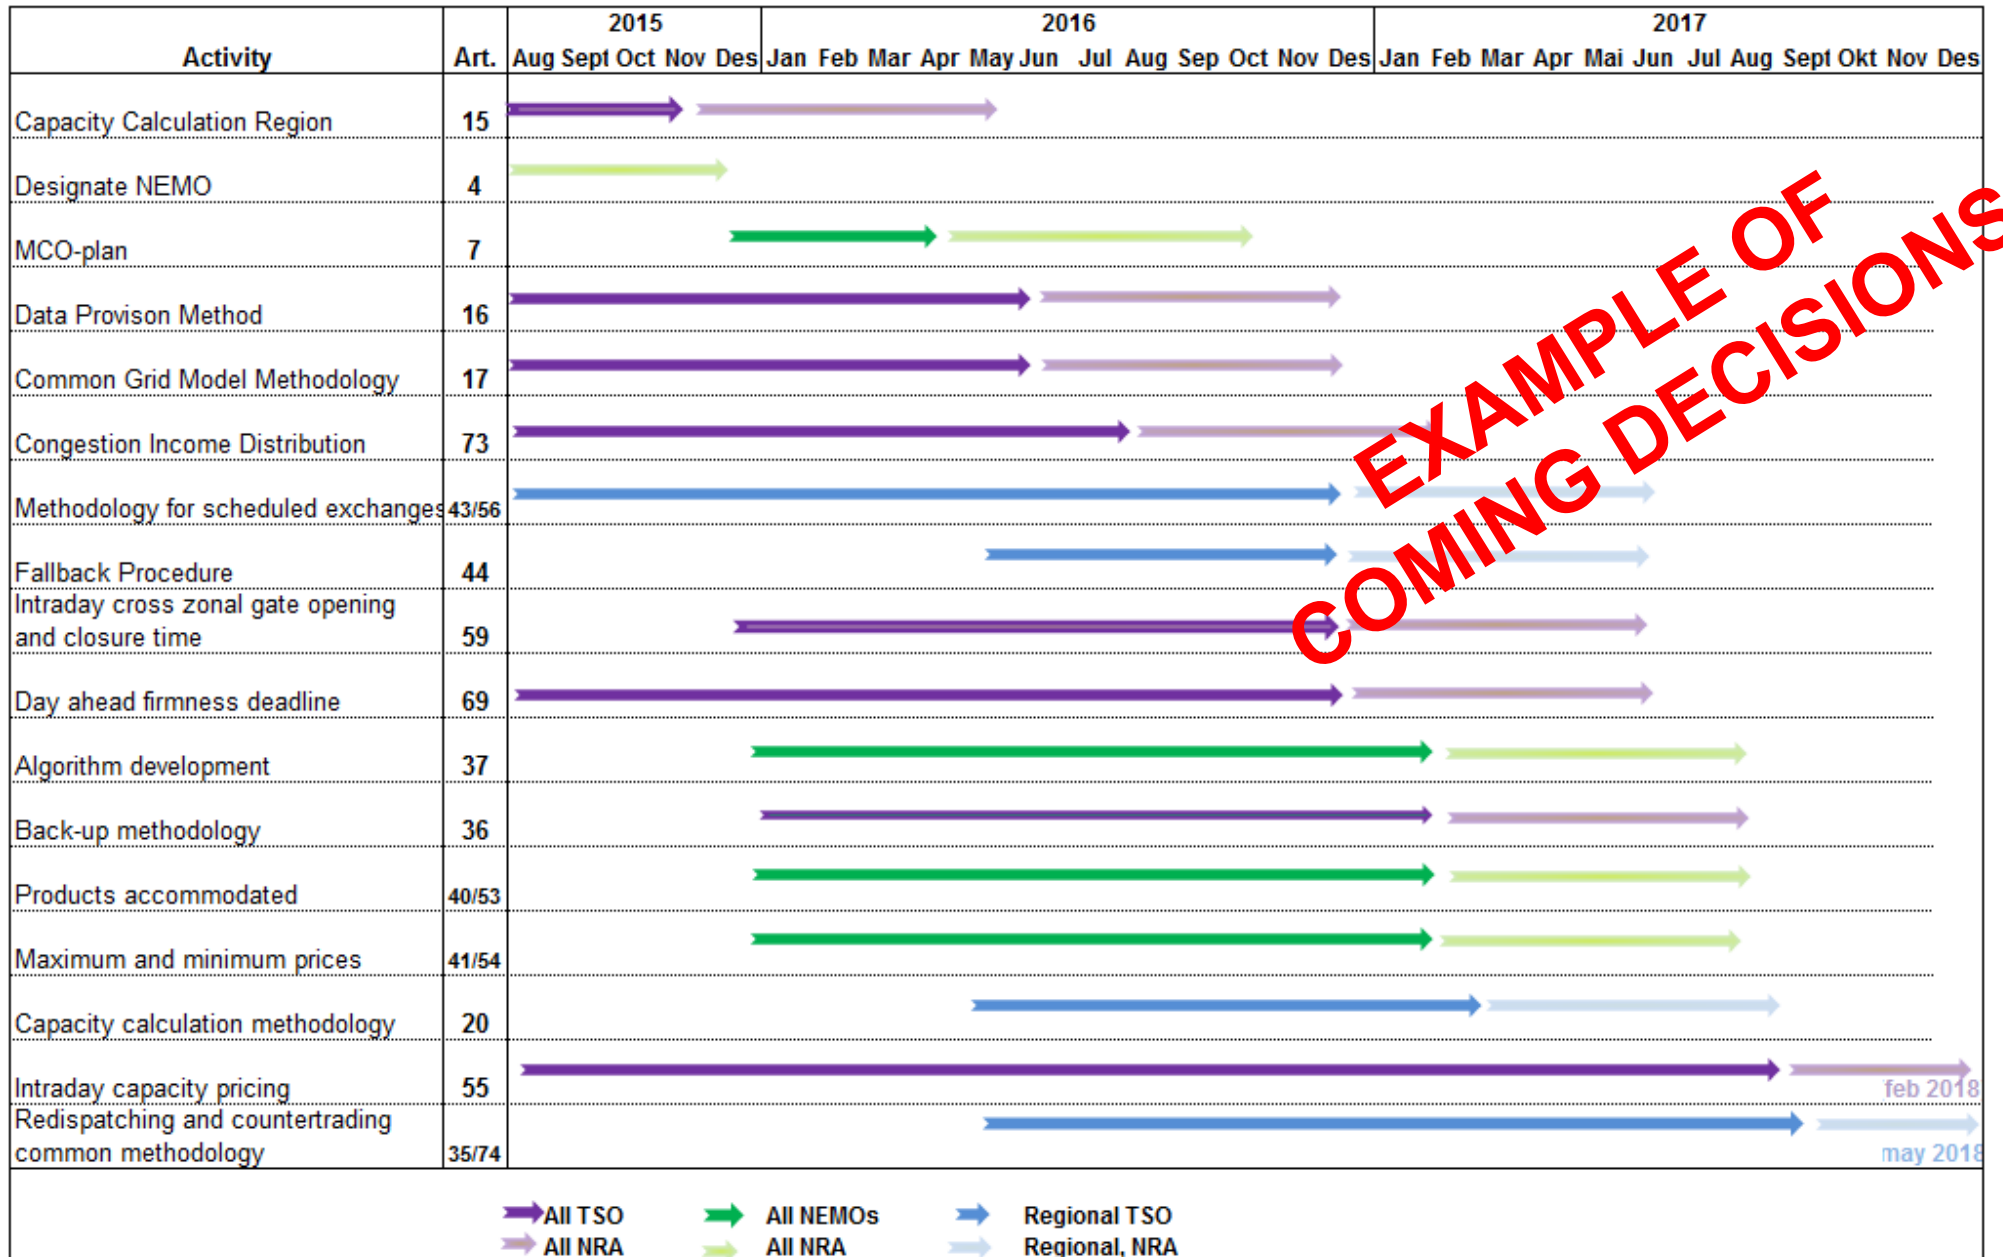

# Coordinating regional approvals and forming common Nordic positions at the EU level

- Working structure aligned with European network codes and guidelines

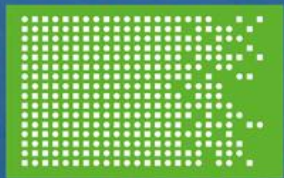

# Overview of European and regional decisions in CACM

# New legislative initiative from the Commission (the Winter Package)

- The European Commission signals:
  - Improved bidding zone review process
  - Increased TSO coordination
  - Regional dimensioning and procurement of balancing reserves, closer to the operational hour
  - Common generation adequacy analysis
- Proposal expected late 2016 – but implementation closer to 2020
- NVE will follow the process closely

NORGES
