Alaska - Bahamas - Norvège - Bavière - Autriche - Slovenie - Seychelles - Cuba – France

Escapades Norvégiennes
JP Pontier & Stephanie Prades
Hodalen - Norway

Good morning Norway,

My name is Marcel Roncari

I live in France since fifty eight years.

I am an international fly-fishing guide and since 25 years I make Fishing Travel and guiding around the world

Since 2009, I make Fishing trips off the Glomma River, always with great pleasure. I find a very great place for my customers in Hodalen, by JP and Stephanie.

But, now, I heard that you have a dam project on the Glomma River.

I can tell you that this will have a negative effect on the fisheries, on the fauna and the flora.

Everywhere, around the world, I see river in poor condition after similar project.

At this time, in France, a big pollution problem affecting the famous Doubs River.

80% of the grayling population from this river died after entry into service of a new dam.

Many people have invested in lodges, shops, hotels and a lot of other things and now, many fishermen customer stopped to visit this region because the fishing is now very bad....

Please, you have a great area, you have a great river, you have the opportunity to develop great fishing tourism in this valley. Take this opportunity.

All wish you all the best

Bye

Marcel Roncari
