

0510 km

Scale (A3): 1:200 000

Legend

WTG [TL.171020.3]

No visible turbines

1 - 5 visible turbines

5 - 10 visible turbines

10 - 13 visible turbines

Map showing the maximum theoretical number of wind turbines that are either completely or partially visible in the affected area.

Calculations are performed using a wind turbine total height of 225 meters (150 + 75) and a viewing height of 2 meters.

The analysis is based on the digital terrain model from Statens Kartverk with 10 meters resolution.

No consideration is taken to account for high buildings or vegetation, therefore the visibility is less than shown on the map.

Map title

**ZVI**

Project

**Kjølerberget**  
Municipality of Våler  
County of Hedmark

File name

ZVI\_Kjølerberget\_2017-12-18.pdf

Contour interval

n / a

Coordinate system

WGS 1984 UTM Zone 33N
